

## Training of Trainers on Adaptive Delta Management

The Training of Trainers (ToT) aims at developing a training on Adaptive Delta Management (ADM) in close cooperation with the proposed trainers. This will be done by providing both content and an environment to work as a team to be able to meet the demands of the proposed trainers. The focus of the activity will be on capacity building for longer term planning and implementation, and improving the capabilities for integrated assessments and analyses, thus widening the scope for solutions and development of sustainable solutions in the delta.

### Programme Masterclass ADM

Venue: ITN Centre's training facilities at BUET
